DUAL MASSAGE SYSTEMS

Therapy Tubs® provides the bath and construction industry with high quality bath products with style and workmanship exemplifying its commitment to uncompromising quality and manufacturing standards that our customers expect and deserve at a fair market price.

Company Highlights

CUSTOMER SERVICE

QUALITY ASSURANCE

METICULOUS ASSEMBLY

Therapy Tubs® proudly carries the mark of CUPC Certification issued by IAPMO R/T assuring our customers that our walk-in bathtubs comply with all product safety and performance standards as well as state and local plumbing, electrical and building codes. It also means that our manufacturing process and products undergo periodic on site follow-up inspections to ensure continued compliance, safety and performance.

Before any tub leaves our factory, we perform a variety of tests and careful inspection of the frame, gel coat finish, overall construction of the tub and three specific water tests. Once your tub passes all quality assessments, it is signed off by a quality assurance specialist, carefully packaged and shipped.

Our customer service team is ready to provide you with technical assistance and support before, during and after installation.

You won't find a finer walk in bathtub with a team more dedicated to your complete satisfaction anywhere!

Health & Therapy

Baths are perfect for those who suffer from arthritis and joint discomfort. The massaging power of a TherapyTubs® walk-in bathtub soothes your aches and pains in a natural way. Gentle, pulsing water penetrates and rejuvenates tired muscles. Our tubs are so easy to access that bathing becomes an effortless experience, enhancing your overall health and well-being.

Imagine the comfort of bathing in a therapeutic spa in your own home. TherapyTubs® Air, Hydro or Dual Massage Systems transform your soaking bath into a pool of rejuvenating waters, soothing your tired and aching muscles.

Our walk-in baths are designed twice as deep or more as the normal bathtub, to give you a full body soak. Additionally, the raised contoured seat and low entry threshold ensures ease of access in and out of the tub, while providing increased comfort. Simply sit down, fill the tub, and experience soothing comfort in your own TherapyTubs® walk-in bath.

*The soothing powers of a
bath begins with
Therapy Tubs®...*

*A Therapy Tubs®
Walk-in Bath ensures
a relaxed, worry-free
experience from the
moment you enter
until the time you exit.*

Waste and Overflow is included on all models and extension panels are provided on baths less than 60" in length.

Feature Highlights

Waste & Overflow

Large, easy grip handle releases the water for quick draining.

Easy Access Panels

Dual access panels are built into both sides of every model for easier installations and service.

Secondary Door Drain

A critical part of our IAPMO certification is the secondary door drain.

Easy Grip Door Lock

Our ergonomically designed door handle with replaceable nylon inserts keeps the door tightly closed and allows for easy operation of the tub door, even for those with weak hand strength.

Extension Panel

Each unit has the ability to extend to a perfect fit, allowing standard and custom installation options. Extension panels allow our baths to fit perfectly into a standard 60" opening.

Highest Standards

All Therapy Tubs® walk in bathtubs are made to ensure a beautiful finish and a lifetime of worry-free use. Our gel coat / fiberglass bathtubs are made using industry-leading technology and the highest quality materials to be as durable as they are beautiful.

Low Threshold Across Entryway

Our tubs have been designed with the lowest possible entryway while staying within the scope of a remodel application for reverse plumbing. The extra low threshold allows a person with hip or knee problems to safely enter and exit the tub.

Ergonomically Angled Grab Bar

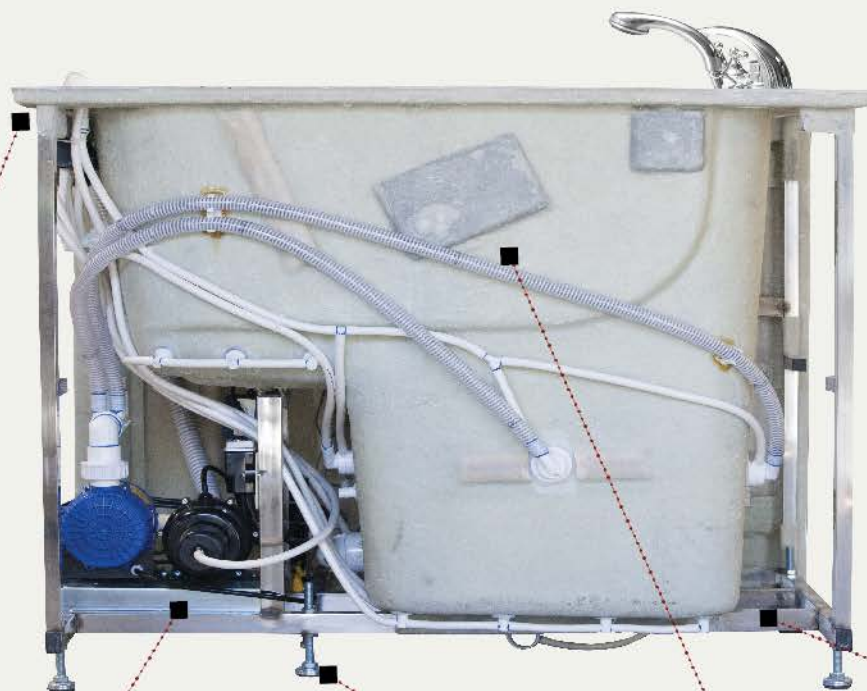

All deep soaker models as well as the Ruby 3052 tub comes equipped with an ergonomically angled grab bar, allowing the bather to sit or stand with the least amount of effort.

Slip Resistant Floor

A non slip floor is on the bottom of each of our Therapy Tubs® for safety and peace of mind.

NOTE:

Premium faucets with hand held shower wands are available on all Therapy Tub® baths.

Tile Flange

The tile flange prevents water from dripping off the deck by creating a water tight seal along all 3 walls eliminating the possibility of water escaping through the walls and causing water damage.

Motor Placement

Motor mounting platform is located under each tub conveniently behind the access panel for ease of service and maintenance.

Adjustable Legs

Six adjustable legs under the tub simplify the installation process and legs ensure stability of the tub so it will not flex when full.

One Piece Construction

All Therapy Tubs® walk-in baths are designed out of a one-piece fiberglass shell and strengthened with additional laminated reinforced sides.

Durable as they are Beautiful.

Durable Frame

Three types of frames are currently being produced for walk-in bathtubs, wood, steel, and stainless steel. Therapy Tubs® uses stainless steel, galvanized steel or power coated steel tub frames to ensure durability and long life.

Gel coat/Fiberglass Certified Shell

Fiberglass is either sprayed and measured automatically to ensure consistency of thickness or laid by hand to prevent air pockets from forming ensuring greater strength and durability.

17" High Contoured Seat

For effortless seating it is important for the seat in the tub to be at least 17" high so that a person can sit down and rise back up easily and safely. The 17" seat height meets ADA standard specifications.

Extreme testing of our hydrostatic door seal gives us the confidence to offer a lifetime warranty on the door seal.

AIR MASSAGE SYSTEM

Therapy Tubs® Air Massage system features 20 individual air jets placed around the tub. These jets send relaxing air bubbles into the water, soothing your aching muscles and rejuvenating your entire body. Your hands, feet, and limbs will feel fantastic after a bath with our Air Massage system. The comforts and therapeutic treatments of a first-class spa are brought to your own home.

Therapy Tubs custom air system.

HYDRO MASSAGE SYSTEM

Nothing soothes quite like a warm Therapy Tubs® hydro massage bath. You'll feel stress and tension melt away as you experience the soothing waters of our Hydro Massage system. Simply lie back and feel your muscles relax and your aching joints reinvigorate. With the Hydro Massage system, an ordinary bath turns into a revitalizing spa treatment. Our Hydro Massage system coupled with our deep, comforting tubs give you a thorough soak and a relaxing water massage.

Therapy Tubs custom jetted hydro system.

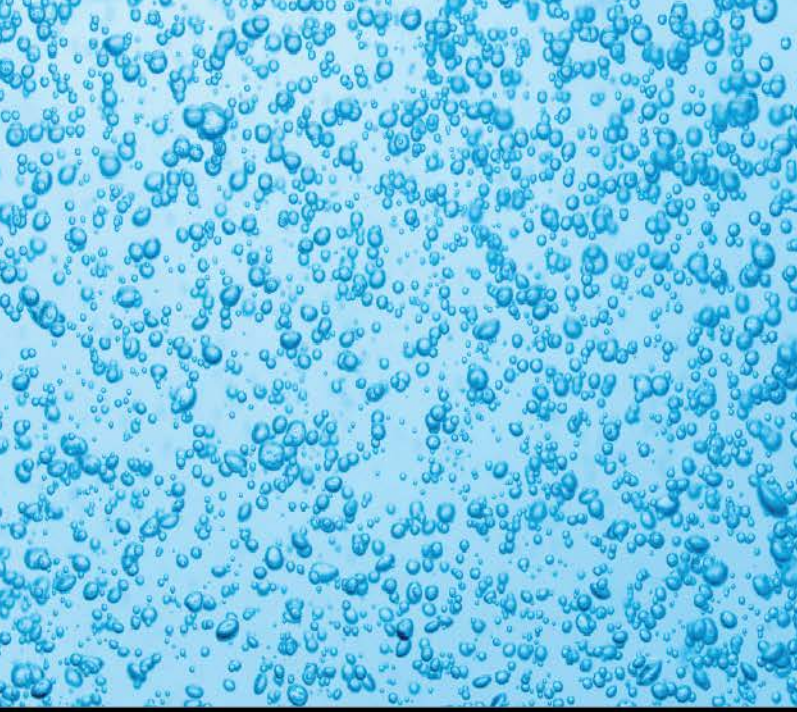

AIR & HYDRO MASSAGE SYSTEM

Our walk-in bathtubs go from fantastic to phenomenal when paired with our Hydro and Air Massage system. The two systems guarantee the complete bathing experience. The relaxing and rejuvenating powers of our Hydro and Air Massage systems are unparalleled. After a long day, nothing makes the body feel better than a thorough soak in a therapeutic spa. Therapy Tubs® revolutionary systems combine a deep cleansing with calming hydrotherapy. Aches, pains, and tired limbs are now a thing of the past. Our Hydro and Air Massage systems offer a superior bathing experience in your own home.

CHROMATHERAPY

Optional Chromatherapy involves the use of light in order to create changes and achieve balance in the mental and physical states. Research has shown that color profoundly influences the emotions, causing reactions within the body and the mind.

SYLLENT PUMP ON SELECTED JETTED SYSTEMS

Therapy Tubs® is proud to offer the revolutionary Syllent motor-pumps on selected walk-in tubs. The Syllent motor-pump helps maintain the water temperature, thus eliminating the need for a heater and additional power requirements. The Syllent motor-pump provides a comfortable whirlpool bath, keeping the water warm as it circulates. The whirling waters relax and soothe tired muscles as you enjoy the comfort of your Therapy Tub, as if you were enjoying a first-class spa in your very own home. Calm, Therapeutic and Relaxing. The Syllent motor-pump is also energy efficient.

GRAB BAR

A grab bar can be added to the top rail of your tub, adding stability when entering or exiting the Therapy Tub.

POLISHED CHROME ADJUSTABLE SLIDER

To conveniently hold your hand held shower.

Options

AROMATHERAPY

Our sense of smell also has a profound effect upon how we feel and what we think about. Advances in aromatherapy have helped Therapy Tubs® take advantage of this healing art, combining fragrance and treatment.

OZONE PURIFICATION ON AIR MESSAGE SYSTEMS

Our walk in bathtubs incorporate nature's method of water purification to sanitize the bath water and create an anti-bacterial environment.

ANTI-SCALDING VALVE

Our Anti Scalding Thermostatic Mixing Valve provides added protection for the bather from potential hot water scalding.

SHOWER CURTAIN

Our custom shower curtain has been designed specifically for walk-in tubs, providing privacy and ensures a splash resistant barrier while bathing or showering.

Electrical components meet UL safety standards. Pump motors, switches and controllers used in our bathtubs have been tested and certified by IAPMO, the most trusted testing laboratory, and meet all standards required to apply for a building permit.

Therapy Tubs® proudly carries the IAPMO Certificate of listing displaying the UPC and CUPC mark signifying that Therapy Tubs® has met all the stringent testing and criteria to display the IAPMO marks on their products and conform to all safety and performance standards. Therapy Tubs® is authorized to use these marks in the US and Canada and are subject to annual inspections to make sure the IAPMO Standards are met throughout the manufacturing process on all of Therapy Tubs® products carrying the IAPMO Marks.

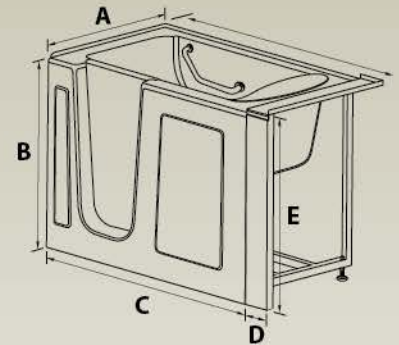

SOAKER BATHS

AIR MASSAGE SYSTEMS

HYDRO MASSAGE SYSTEMS

DUAL MASSAGE SYSTEMS

Durable high gloss gel coat finish with integral front access panels for servicing.

A filler panel is included behind the head rest of the tub for standard 60" tub installations. Also included with each tub is a waste & overflow assembly.

All tubs are available in a left or right hand drain/door configuration and are offered in white or biscuit colors.
